We are currently looking for a **Data Analyst** to join our Data Science unit.

### Main responsibilities:

- Conducting automated statistical analyses for clinical and preclinical studies.
- Designing and developing new tools and web applications for clinical research.
- Developing prognostic and predictive models for biomarker validation in oncology.
- Reviewing documents related to research projects, preparing statistical analysis plans (SAP), and statistical reports.
- Supporting the design of electronic case report form (eCRF) in REDCap.
- Using advanced biostatistical programming expertise to support sample size calculations, statistical power assessments, and the design and implementation of algorithms for health data analysis, including survival analysis.
- Staying informed on the latest developments in cancer research and statistical methodologies.
- Providing support for both internal and external communications related to scientific activities.

### Requirements and skills:

- Bachelor's or master's degree in Biostatistics, Statistics, Data Science, or relevant experience/master's in a related field.
- Proven ability to plan, create, program, and manage complex statistical databases.
- Skilled in the use of database management software.
- Strong understanding of biostatistical methods, gained through education and practical experience.
- Experience in clinical research within (bio)medical or academic settings, particularly at clinical and/or preclinical research centers; knowledge of molecular biology will be a plus.
- Computer and analytical skills, proficiency in R programming, knowledge of SAS, Python, SQL. Other programming languages will also be considered as an asset.
- Proficiency in spoken and written Spanish with a strong command of English.

### What we offer:

Explore the opportunity of joining a dynamic and ambitious group with international projection in the breast cancer research.

We offer a balanced work-life environment, including the flexibility to work from home up to three days a week, a flexible work schedule, an appealing office location and additional benefits.

### Should you be interested:

Please send your to: [seleccion@gruposolti.org](mailto:seleccion@gruposolti.org)  
Our team will review your application and will contact you in case your profile fits with the requirements for the position.
